

HIMetrix™

Web-based, Data Analytics and Consulting

- Delivers web-based business intelligence and data analytics
- Provides computer-enabled data collection and customized reporting
- Establishes core operational analytics and consultative reporting
- Captures and analyzes key operational metrics
- Utilizes best practice-based embedded logic

HIMetrix analytics is designed specifically to capture, analyze and interpret relevant revenue cycle data as it relates to HIM operational procedures. This powerful tool allows CFO's, CIO's, Revenue Cycle and HIM directors to have access to a unique narrative along with performance dashboards specific to their environment. Utilizing proprietary Data Analytics Modeling coupled with extensive web-based collection and reporting tools, HIMetrix forever changes the process of traditional consulting to a more interactive and personalized experience—saving time, resources and reducing costs.

H.I.Mentor's staff provides outstanding professionalism in their consultation. Reports and recommendations are clear and concise. They are presented in an easy to understand and implementable format delivered with an unpretentious demeanor that is refreshing.

—Paul Teodo
VP/Chief Operating Officer
Holy Cross Hospital, Chicago, IL

HIMetrix resolves the operational dilemma of being able to clearly measure HIM performance against industry-wide best practices. Whether you are a regional HIM director with multiple HIM departments requiring customized metrics and reports, or a CFO seeking a better understanding of performance drivers for a more successful operation, HIMetrix Analytics is your solution.

—Darice Grzybowski,
MA, RHIA, FAHIMA
Founder/President, H.I.Mentors, LLC

Data Assets

Unless you have reliable and useful data, you are powerless to create meaningful changes in operational procedures. In today's fast-paced business environment, collecting, analyzing and comparing data quickly and accurately is essential to an efficient operational workflow, improved accuracy and profitability. HIMetrix™ analytics enables:

- Remote data collection through comprehensive online surveys customized around client-specified organizational goals
- Standard and customized functionality questions formatted to ensure consistency and relevant data collection
- Capture, storage and organization of relevant data electronically with real-time, 24/7 access via the Internet—*without IT intervention*

Ask Yourself

- Do I really have a firm grip on core operational procedures in the HIM department?
- Would I like to be able to measure key indicators on an ongoing, consistent basis?
- How can I know that the data I am tracking is relevant, timely and accurate?

HIMetrix analytics is designed to facilitate the collection and analysis of data using a consistent, organization-wide method that supports accelerated and improved decision-making through better understanding of critical core measures.

Analytic Process

Having access to reliable, yet customizable data is the first step to managing and understanding a department's level of performance. Coupled with a comprehensive accurate analysis of that data, a manager has the necessary information to make critical decisions for the organization. Proprietary business intelligence software with web-based collection and reporting enables HIMetrix to provide both qualitative and quantitative evaluation of compliance, operational, and financial indicators that impact the performance of your HIM department.

Ask Yourself

- Am I sure that I am looking at the right data?
- Is my decision-making process based on objective fact or subjective assumption?
- Do I have a clear understanding of industry standards and how they relate to my processes and workflow?

HIMetrix reporting tools focus on defining, identifying and measuring variances in operational procedures when compared with internal organizational standards and industry-accepted best practices. Armed with accurate and relevant data, a manager can make thoroughly researched decisions that proactively influence departmental operations and performance.

HIMetrix's unique, patent-pending process of collecting, analyzing and reporting revolutionizes the traditional consulting model. Virtual consulting ensures objectivity and time sensitive feedback. The graphs, dashboards and automated narrative give healthcare professionals complete confidence in understanding and managing all key processes and performance related to Health Information Management.

Operating System Requirements

HIMetrix analytics is a browser-based tool that requires no special software and supports all popular browsers in use today, regardless of the operating system.

- Microsoft Windows: Windows 95/98/ME/2000/XP/Vista/7
- Apple: OS X All versions
- Unix/Linux: All versions supporting Mozilla Firefox

About H.I.Mentors

H.I.Mentors is an Health Information Management (HIM) and Revenue Cycle Management consulting firm founded by nationally recognized HIM leader Darice Grzybowski, MA, RHIA, FAHIMA. H.I.Mentors employs leading industry experts with decades of combined experience to provide focused consulting programs that simultaneously help improve compliance, motivate staff, mitigate risk and reduce costs for facilities. Our hands-on mentoring approach helps your HIM and Revenue Cycle department improve their operations to help you optimize performance and improve your bottom line.

The challenges along the eHIM Continuum™ are many. Our expertise can help ensure your success and smooth transition as you migrate toward the EHR.
